Learned how to translate requirements and design concepts into interactive prototypes that demonstrate the layout, functionality, and user flow of a software application or website.

Business Development

- Gained knowledge about understanding what business needs are, for maintaining relationships with clients.
- Acquire about market research and analysis to identify potential clients and opportunities for business growth.
- Proficient in SDLC methodologies for developing products, software, and services.

Professional Experience

SAP ABAP Consultant – Sysquare Technologies Pvt. Ltd.

January 2023 – Current

- In my role as an SAP consultant, I routinely interacted with clients to understand their business requirements and translate them into SAP solutions. This involved conducting meetings to gather requirements, presenting proposed solutions to clients, and obtaining feedback to ensure alignment with their goals.
- Created various reports like ALV Grid Reports, Interactive Reports & Classical Reports as per business requirements.
- Developed and tested custom programs in SAP ABAP for the client's requirement.
- Worked on BDC programming for uploading large volumes of data into SAP system by writing batch programs.
- Created custom forms for purchase orders and sales orders. Also, developed programs to print these forms and made sure they could be easily called and used.
- Worked on the creation of custom database tables, & fetching data from various standard tables.
