WORK EXPERIENCE

Web Developer (Full-time)

Neritic Industries

- I create engaging, responsive websites, manage social media platforms, and create visuals, contributing to various web projects across different domains. Recently, I completed my first web project, the [Imperiums](#) website, within the last month.

Jul 2024 - Ongoing

Pune, Maharashtra

Administrative Intern

Info Space Export

- I spearheaded the creation of impactful SRS documents and pitch presentations, designed visually captivating marketing materials, and launched a successful poker website, resulting in significant increases in sales leads, brand awareness, website traffic, and user engagement.

Sep 2023 - Jan 2024

Gurugram, Haryana

Web Developer Intern

Qualwebs

- I developed a user-friendly website using HTML, CSS, and Bootstrap, improved home living with smart electronic devices, and received positive feedback for my work showcased on the [Rehwasi](#) website, resulting in increased user experience and website conversions.

May 2022 - Jun 2022

Indore, MP

Social Media Manager Intern

The Cyber Delta

- I created a suite of social media templates enhancing brand consistency and engagement, utilized Canva, Adobe XD, and Photoshop for high-quality design projects, and collaborated on insights into emerging trends.

May 2022 - Jun 2022

Bhopal, MP

PROJECTS

Community Homes

Sep 2023 - May 2024

- As a UI Designer for Decor Delights, I crafted immersive 3D designs for personalized home decor, streamlined collaboration using Figma and GitHub, and contributed to the live Decor Delights platform, enhancing user experience and design realization. - [Decor Delights](#)

Empower Donation

May 2023

- As the UI Designer for the Empower Donation project, I created a transparent Donation Process app that increased user trust and donations by clearly detailing the impact of supported charities, contributing to a stronger social impact. - [Empower Donation](#)

Healthcare Website Design

Feb 2022 – Jun 2022

- As a Front-end developer for the Health Awareness project, I created a robust website using HTML/CSS, and JavaScript that features a BMI calculator with personalized diet and yoga recommendations, enhancing user health management and overall well-being. - [Healthcare](#)

EXTRA-CURRICULAR

Achievements

- I showcased my skills and secured a finalist spot in the prestigious Gigabyte DSA competition at the College of Engineering Roorkee.
- I demonstrated technical expertise and creativity as a semi-finalist in National Hackathon 2.0, collaborating to develop innovative solutions to real-world problems.
- I participated in the Smart India Hackathon 2023, contributing to the national conversation on technology and innovation.

Designing

- Graphic Design: Proficient in Canva, CorelDraw, Illustrator, Photoshop, and Adobe XD.
- UI/UX Design: Skilled in Figma and Uizard, utilizing these tools to create user-centered designs.
- I completed a freelance project with Replix, demonstrating my capability to work autonomously and deliver top-notch designs that meet client expectations. - [View Certificate](#)

Leadership

- I played a crucial role in college clubs like GDSC, Igniters, DSC, and iOS, contributing to management teams and showcasing strong teamwork skills.
- I also led online events and career discussions, demonstrating effective leadership and team management abilities.
