SUMMARY

With 3 years of experience in web design, I have honed my skills in HTML, CSS3, JavaScript, React Material UI, Tailwind CSS, Bootstrap, Photoshop, and Figma. During my previous role, I successfully collaborated with clients and internal teams to deliver visually appealing websites that exceeded client expectations. I have a proven track record of optimizing websites for mobile responsiveness and fast loading times, resulting in improved user experience and engagement. My passion for web design and commitment to staying updated with industry trends have allowed me to create innovative and user-friendly designs that drive results for clients.

KEY ACHIEVEMENTS

Website Redesign Success

Redesigned 15 websites, increasing user engagement by 30%.

E-commerce Site Launch

Led a team to develop an e-commerce site boosting sales by 20%.

Optimized Mobile Loading

Improved load times by 40% on mobile interfaces for 10 clients.

PROJECTS

Sevenunique

Website: <https://www.sevenunique.com/>

SevenUnique is a modern business website where I handled the entire frontend design and development, focusing on typography, visual layout, animation flow, sliders, and complete responsive structure.

Key Contributions:

- Designed the full UI with modern and clean typography styling for better visual hierarchy.
- Developed custom slider logic for interactive content transitions and smooth navigation.
- Implemented engaging animations and motion effects to enhance user experience.
- Built a fully responsive layout ensuring perfect performance on mobile, tablet, and desktop.
- Designed and maintained consistent frontend components, optimizing usability and visual appeal.

Sevenunique Admin Panel

Website: <admin.sevenunique.com/homewww.sustlyo.com>

Developed a fintech admin dashboard using React.js and Bootstrap. Included features like analytics, user management, and service control panels, all within a clean and functional layout.

Key Contributions:

- Designed and developed an admin panel for fintech services using React.js and Bootstrap.
- Implemented user management, dashboard analytics, and data visualization features.
- Ensured security best practices for user data handling.

JajamBlockPrints

Website: <https://jajamblockprints.com>

Jajam Block Prints is an e-commerce platform where I designed and developed the entire frontend interface, focusing on product UI, cart interactions, pricing logic, and complete mobile responsiveness.

Key Contributions:

- Designed the full e-commerce UI, including product cards, layouts, and detail pages.
- Developed Add to Cart functionality with smooth interactions and visual feedback.
- Implemented product quantity counter and dynamic updates in the cart.
- Built pricing calculation logics, including item total, quantity changes, and cart updates.
- Ensured full mobile-first responsiveness for all pages using a clean, scalable layout.
- Created UI aligned with product styling and brand identity to improve user experience.

Finunique Utility Website

Website: <https://finuniques.in>

FinUniques is a financial services platform where I contributed to the complete frontend development process, focusing on UI design, interaction logic, and responsive layout implementation.

Key Contributions:

- Designed modern and user-friendly UI layouts across multiple sections of the website.
- Developed custom slider logic for interactive content transitions.
- Implemented smooth animation effects to enhance user engagement and visual experience.
- Built and maintained a fully responsive Tailwind CSS grid system ensuring consistent layouts across all screen sizes.
- Planned and optimized mobile-first responsiveness for a seamless browsing experience.
