PROJECTS

Road Accident Reporting Dashboard in Excel

The **Road Accident Dashboard Using MS Excel** offers a detailed analysis of road accidents by visualizing key metrics such as accident frequency, location, causes, and severity through charts and graphs. This dashboard helps users identify trends, analyze data, and make informed decisions to improve road safety. By simplifying complex accident data, it provides stakeholders with a clear understanding of critical areas that need attention. The tool is designed to track and monitor road accident patterns effectively, enabling organizations or authorities to implement safety measures and reduce accidents efficiently.

Research Paper

The Impact of Remote Work on Employee Productivity

This research examines how remote work affects employee productivity. It explores both positive and negative impacts, including increased flexibility, better work-life balance, and reduced commuting time, which often lead to improved focus and efficiency. The study analyzes various factors like industry type, management practices, and employee adaptability to understand how remote work influences performance.
