## SUMMARY

Highly motivated and aspiring Junior UI/UX Designer with a strong academic foundation in design thinking, human-computer interaction, and product strategy. Recently completed [B.A. in Mgsu Univercity], where I mastered the entire design lifecycle, from user research and conceptualization to delivering polished, accessible interfaces. Proficient in Figma, Sketch, and Adobe Creative Suite, with practical experience in wireframing, rapid prototyping, and usability testing. Eager to leverage a robust portfolio of project case studies and collaborate cross-functionally to create intuitive and impactful digital products.

- CSS
- JAVASCRIPT
- BOOTSTRAP
- REACT JS
- FIGMA & ADOBE XD
- ADOBE PHOTOSHOP
- ADOBE ILLUSTRATOR

## LANGUAGES

- English
- Hindi

## PROJECTS

### Online Food Ordering App

- Foodie is a modern food ordering app designed to provide a smooth and easy user experience. It allows users to explore different dishes, view details like price, rating, and spice level, and place orders quickly. The app includes key screens such as a splash screen, home page, product details, payment method, and order success page. With a clean and attractive interface, Foodie focuses on simplicity, convenience, and secure payments. This project helped me understand the complete process of designing a food delivery app, from user interaction to final order confirmation, using creative layouts and user-friendly design principles.
