Projects

Room Dekho

- Technologies: HTML, CSS, JavaScript, PHP/Python, MySQL
- Developed a project titled "Room Dekho", aimed at helping users find rooms for rent easily. The system allows users to search, view, and filter available rental rooms based on location, price, and availability.
- I contributed to the front-end layout using HTML and helped implement search logic in Python.

Teacher Time-table Management

- Technologies: Java/Python/PHP, MySQL, HTML, CSS, JavaScript
- Developed a web-based Teacher Management System to manage teacher profiles, subject allocation, attendance, and schedules.
- Implemented CRUD operations for adding, updating, and deleting teacher records using a relational database.

Online Library Management System

- Technologies: PHP, MySQL, HTML, CSS
- Designed and implemented a system to manage book inventory, issues, and return records.
- Improved data retrieval using structured database queries.

E-Commerce Website

- Technologies: Java, JSP, Servlets, MySQL
- Developed an e-commerce web application with user authentication and product management features.
- Integrated database connectivity for order processing and customer data storage.
